

MYOPIA CONTROL DROPS

Studies show that a low-dose of atropine, typically administered as eye drops in the evening, has the potential to significantly slow the progression of myopia in children – helping prevent severe nearsightedness.^{1,2}

To make caring for your child's vision simpler, OMNI compounds high-quality atropine medication, as customized by your prescriber.

"OSRX is easy to work with and provides top-of-the-line drops. Since we brought Atropine therapy into our practice for myopia control, they've made it both affordable and easy to get ... I highly recommend OSRX for all of your compounding pharmacy needs."

– Brianna Rhue, OD
 West Broward Eyecare Associates

PATIENT EXPERIENCE IS AT THE HEART OF OSRX™. It's why our pharmacists and technicians are always just a phone call away, why we compound multiple medications into a single dose to simplify eye care and why we offer affordable, transparent prices.

Here is what patients say about our formulations, pricing and services.*

of patients **would recommend OSRX** to a friend or colleague.

of patients **enjoy the convenience** of taking fewer drops per day.

of patients report taking fewer drops per day **helped** them adhere to their dosing schedule.

of patients say that their OSRX formulation was **easy to use**.

of patients say it's **more convenient** to have their medication shipped to their home (or doctor's office) instead of visiting a traditional pharmacy.

of patients agree that their OSRX formulation was **reasonably priced**.

*Data according to OSRX patient satisfaction survey, July 7, 2020.

A NEW VIEW OF MEDICINE®

Our team works hard to exceed all industry standards and requirements. To confirm sterile integrity, our clean room is tested and certified. To ensure accuracy, all sterile manipulations are performed only by our Pharmacists. All of our Pharmacists obtain an advanced certification in aseptic techniques specifically for compounding, which is beyond the industry standard. We take these steps and many more to ensure, with confidence, that you will receive the highest quality with each and every sterile medication we compound.

 OPHTHALMIC
 SOLUTIONS**

CATARACT, LASIK, GLAUCOMA & MYOPIA

Post-operative drop care for surgical vision correction and glaucoma management can be challenging and expensive. We developed and optimized OMNI to improve this essential part of the patient experience. Using OMNI, you can decrease your patients' out-of-pocket expenses by sparing them from having to purchase multiple medications, while simultaneously providing a customized drop plan that is simpler than the traditional multi-drop regimen. This simplicity reduces barriers to use and promotes easy adherence.

CATARACT & LASIK DROPS

Cataract and LASIK formulations are water soluble and gentle on the cornea.

\$40 / \$70
Prednisolone Phosphate (1%) |
Gatifloxacin (0.5%) | Bromfenac (0.075%)
 Sterile Ophthalmic Solution
 (4 & 7mL)

\$40
Prednisolone Phosphate (1%) |
Bromfenac (0.075%)
 Sterile Ophthalmic Solution
 (4mL)

\$40 / \$70
Prednisolone Phosphate (1%) |
Gatifloxacin (0.5%) | Ketorolac
Tromethamine (0.5%)
 Sterile Ophthalmic Solution
 (4 & 7mL)

\$40
Prednisolone Phosphate (1%) |
Ketorolac Tromethamine (0.5%)
 Sterile Ophthalmic Solution
 (4mL)

\$40
Prednisolone Phosphate (1%) |
Gatifloxacin (0.5%)
 Sterile Ophthalmic Solution
 (3.5mL)

\$15
Cyclopentolate HCl (1%) |
Phenylephrine HCl (2.5%)
 Sterile Ophthalmic Solution (2mL) **NEW**

Cyclopentolate-phenylephrine can be administered prior to surgery, potentially expediting the pre-operative process and reducing patient wait times.

\$11
Brimonidine Tartrate (0.2%) |
Dorzolamide (2%)
 Sterile Ophthalmic Solution (2mL) **NEW**

Brimonidine-dorzolamide, dosed postoperatively, can mitigate the potential for IOP spikes.

CATARACT INTRACAMERAL INJECTION

\$25
Dexamethasone Phosphate (0.1%) |
Moxifloxacin HCl (0.5%)
 Sterile Ophthalmic Injection
 (1mL)

The formula of this intracameral injection is transparent, allowing a patient to leave your operating room without the milkiness that typically occurs with other post-op intravitreal injections.

"Having used the (OMNI) compounded postoperative cataract surgery drops in over 5,000 patients, I can confidently say this has improved compliance, streamlined standardization and provided top-notch safety in my cataract surgery post-op patients."

– Elizabeth Yeu, MD
 Virginia Eye Consultants
