

AVAILABLE FORMULATIONS

Every ERx system is different, so it is important to ensure your ERx properly works with our software system by submitting a test script. The information below will guide you through the entire process.

Cataract/Refractive:	Fill Size
<i>These formulations call for Prednisolone Sodium Phosphate 1%, not Acetate 1%. Make sure the formulation you select is a solution, not a suspension.</i>	
Prednisolone Sodium Phosphate 1%, Gatifloxacin 0.5%, Bromfenac 0.075%	4mL & 7mL
Prednisolone Sodium Phosphate 1%, Bromfenac 0.075%	4mL
Prednisolone Sodium Phosphate 1%, Gatifloxacin 0.5%	3.5mL
Prednisolone Sodium Phosphate 1%, Ketorolac 0.5%	4mL
Prednisolone Sodium Phosphate 1%, Gatifloxacin 0.5%, Ketorolac 0.5%	4mL & 7mL
Cyclopentolate HCl 1%, Phenylephrine HCl 2.5%*	2mL
Brimonidine Tartrate 0.2%, Dorzolamide 2%*	2mL

Glaucoma:	Fill Size
<i>These formulations are NOT preservative-free. They have a small amount of BAK (<0.01%). If the formulation in your system calls for preservative-free drops, select that formulation and write, "0.01% BAK is ok" in the notes to the pharmacist.</i>	
Timolol 0.5%, Latanoprost 0.005%	3.5mL
Timolol, 0.5% Brimonidine 0.2%, Dorzolamide 2% "AM Formula"	3.5mL
Timolol 0.5%, Brimonidine 0.2%, Dorzolamide 2%, Latanoprost 0.005% "PM Formula"	3.5mL

Intracameral Injection:	Fill Size
Dexamethasone Sodium Phosphate 0.1%, Moxifloxacin HCl 0.5%	1mL

Myopia Control:	Fill Size
Atropine 0.01%	3.5mL
Atropine 0.025%	3.5mL
Atropine 0.05%	3.5mL

ORDERING THROUGH YOUR EMR SYSTEM

1. Locate the Pharmacy

OSRX Pharmacy is listed in most ERx systems as OSRX in Missoula, MT. Note that it may appear in the mail order or the retail pharmacy section. Also, if you are using EPIC, uncheck box that reads "search only pharmacies in patients' vicinity".

OSRX identifying numbers are below.

- **OSRX**

1120 Kensington Ave Suite E, Missoula, MT 59801

Phone: (855) 466-1076

Fax 1: (406) 541-6267, **Fax 2:** (406) 493-0757

NCPDP: 2784418 **NPI:** 1588122345 **Surescripts ID#:** PKX27844180551314764

2. Product/Formulation Break Down:

- *Search for one of the compound ingredients ("Pred" for Prednisolone-Gatifloxacin-Bromfenac) and select compound from the EMR list.
- Most ERx systems have our formulations in their database; you just need to search for them and confirm the quantities and strengths match. If a formulation does not appear exactly as it is listed above, we will contact your office to confirm the correct medication before shipping.
- To help avoid this situation, write a message in the notes section of your e-script so the pharmacist knows a substitution is approved. For example: If Prednisolone-Gatifloxacin-Bromfenac appears in your ERx as 3.5mL, but the OSRX formulation is 4.0mL, write "4 mL is ok".

3. Sending the Test Script

- Under a test patient, search for a new pharmacy or add it in manually with the OSRX info on the previous page, then save it to favorites.
- Search for these formulations and **make sure the strengths and quantities (mL) match**. Under search for medication, for example, start by typing the word "prednisolone."
- If the formulations aren't in the system, try to add them under the free-form compounding tab and save to favorites.
- As a last resort, try sending us a script for prednisolone 1% and add the rest of the formula in the notes section.
 - ⦿ For example: Select prednisolone 1%, 5mL, and in the notes section put "add bromfenac 0.075%, prednisolone phosphate and 4.0mL is ok".
- Send a test script to ensure the patients phone number and address come through on our end. (They don't always come through properly). **MAKE SURE YOU SEND A TEST SCRIPT**, but don't worry, **WE WILL NOT FILL a script with "TEST" as the patient name**. Save the formulation under the doctor list or favorites so it is easily accessible for future scripts.
