OSRX continues to capably traverse the uncertain pandemic-era marketplace by adhering to a core formula ... Our success is predicated on providing quality corrective vision care products that are affordable and easy to use, and it's all guided by our unparalleled customer service. We take care of our doctors and their patients.

Our employees are laser-focused on optimizing every compounded ophthalmic formulation we supply and streamlining the ordering process for the doctors and their patients we serve. By delivering fewer drops-per-day simplicity, reasonable pricing and reliable hands-on customer support, the OSRX team continues to encourage patient compliance and serve as a model for compounding pharmacies.

A handwritten signature in black ink, appearing to read 'Anthony Sampietro', written over a light background.

Anthony Sampietro
OSRX Co-Founder/CEO

Amy Frost, B.S., PharmD, RPH
Chief Pharmacy Officer

"OSRX has worked for years to develop a compounding process that is safe, reliable and convenient for our patients. We are constantly testing and adapting our methods to stay current, so that we can provide a quality option for each patient and do so with compassion and dignity. We believe that by putting the patient first we are developing a culture of excellence."

Our dedication to patient safety and quality is unrivaled. This unwavering commitment to excellence is achieved by combining three core ingredients:

Our Team + Our Pharmacy + Our Formulations

Our Team

Our talented team has led OSRX to become certified by the Pharmacy Compounding Accreditation Board (PCAB), a designation reserved for less than 1 percent of compounding pharmacies in the U.S.

Pharmacists at PCAB Pharmacies...

- ✓ Strictly adhere to precise sterile work preparation procedures
- ✓ Undergo rigorous training
- ✓ Maintain skills certification and competency evaluations
- ✓ Participate in on-going education for QA, QC, Product Testing, Validation Testing and Environmental Monitoring

Our Pharmacy + Formulations

Our OSRX lab in Missoula, Montana utilizes only the highest grade active pharmaceutical ingredients, the latest technology and equipment, and strictly adheres to USP 795 and 797 compounding guidelines.

- ✓ Lab and team members meet or exceed all rigorous national standards
- ✓ All sterile manipulations are performed only by our pharmacists
- ✓ All pharmacists have earned advanced certifications in aseptic techniques
- ✓ Clean room is tested and certified
- ✓ Adherence to strict guidelines and safety means every ophthalmic formulation we compound is of high quality, simple to use and affordable.

Lauren Shulund, CPHT
Customer Service Manager

"We take pride in giving every patient the white glove treatment. We listen to our patients, make them feel comfortable, understand what they are going through and, ultimately, make sure they have what they need for their surgery. We're like the bar from Cheers, where you know everyone by name. The human touch goes a long way."

Patient experience is at the heart of OSRX. It's why our pharmacists and technicians are always just a phone call away, why we compound physician prescribed medications to simplify eye care.

Here is what our patients say about our formulations, pricing and services.*

96%
say they are satisfied with OSRX overall

97%
say their formulation was easy to use

92%
say they are satisfied with OSRX customer service

96%
say they enjoyed the convenience of taking fewer drops per day

97%
say taking fewer drops helped them comply with their daily dosing regimen

96%
agreed or somewhat agreed their shipment arrived when expected

**Data according to OSRX patient satisfaction survey, March 2022.*

Compounded drugs are not FDA-approved, which means they have not undergone FDA premarket review for safety, effectiveness, and quality. 503A compounding pharmacies are not required to comply with cGMP requirements but can be inspected by FDA. Prescription Processing

1

You **send us a script** through your current EMR system or through our online portal

2

We will then **process the script** within 24 hours of when we receive it

3

The patient will receive **an automated phone call** and **a text** as soon as that script is processed. This call lets them know we have their prescription, and if they...

...answered the phone, they can **press 1** to talk to a pharmacy tech live.

...didn't answer, we will leave them a **voice message** to call us back.

They can also **click the link in their text message** to pay the invoice if they don't want to talk to anyone at all.

See a video showing exactly how that works ►

4

The patient will then **verify their information** on the prescription and submit payment

5

The medication **ships via USPS** 3-7 day directly to the patient's home the same day.

- The medication ships for free, but if needed we can expedite the shipment via FedEx 2nd Day for an additional \$12.50 or FedEx Overnight for an additional \$40

Watch our video on how our prescription process works:

We also have an **online portal** where staff can see every script that has been sent, and track it from fulfillment to delivery to the patient's door.

"We've worked with multiple compounding pharmacies in our quest to make drop therapy more convenient, cost effective and compliant. OSRX has delivered where no others were able — providing high-quality, user-friendly and **affordable compounded medications** with unparalleled customer service."

— Paul Mann, MD & Luke Barker, MD
Mann Eye Institute and Laser Center

"Patient **convenience and comfort!** Other compounded drops were terribly uncomfortable!"

— Michael Rolfsen, MD
Waco Ophthalmology

"It is very convenient that patients have to only use one bottle of medications for surgery. It has eliminated any confusion on the patient's end and **decreased chair time during post-op evaluations.** I am very pleased with the compounded eye drops that we order through OSRX."

— Michael Rom, MD
Insight Eye Center

"I'm not a pharmacist! I don't know how much my patients' drops will cost at a traditional pharmacy — but I **know the cost from OSRX for every single patient.**"

— Marc Moore, MD
Graves Gilbert Clinic

"From the very beginning of our relationship with OSRX, their team has provided **top-notch customer service** to our staff and patients. Their products are affordable for our patients and provide them with an easy, all-in-one system to use for their pre/post-operative treatment. In addition, their continued support and follow-through is exceptional."

— Angie Ridge, Director of Surgery Counseling
John-Kenyon Eye Centers

Intracameral Injections

Our OMNI **intracameral injection** is transparent, allowing patients to leave your operating room with clear eyes and uninhibited vision. OMNI injections ship directly to your surgery center or practice at no added cost.

\$25

Dexamethasone Phosphate (0.1%)
Moxifloxacin HCl (0.5%)
Sterile Ophthalmic Injection
(1mL)

“What we love about compounded intracameral injection, is that it really reduces the need for post-operative drops in my patients. They come out the next day, they have very clean eyes, they have really clean corneas without any significant edema and they are very happy.”

— James Khodabakhsh, MD
Beverly Hills Institute of Ophthalmology

Myopia Management Drops

Studies show that a low dose of **atropine**, typically administered as eye drops in the evening, has the potential to significantly slow the progression of myopia in children – helping prevent severe nearsightedness.^{1,2}

To make caring for your child's vision simpler, OMNI compounds high-quality atropine medication, as customized by your prescriber.

Minimizing Patient Eye Drop Confusions Was Job No. 1 for My New Ophthalmology Practice

By Dr. Preeya Gupta, MD

After 10 years at an academic practice, Dr. Preeya K. Gupta opened her own ophthalmology practice in July. As the founder and managing director of Triangle Eye Consultants, which is “dedicated to providing (patients) the latest treatment advances in cataract surgery, dry eye disease treatments and corneal disease management,” Dr. Gupta and her team immediately began using compounded eye drops from OSRX®.

Being part of an academic institution for the first part of my career provided an ideal foundation for my education and growth. Over time, as with many practices, becoming a higher volume cataract surgeon eventually created stresses in the system such that both doctors and patients were confused about post-operative drops in terms of what was being prescribed and what the patient received. When we opened the doors at Triangle Eye Consultants earlier last year, we decided in our nimble environment to explore some new methods to address some of the major pain-points for patients and clinicians.

As a new cataract and refractive-focused practice, one of our first steps was to begin using compounded eye drops postoperatively. By offering patients a high-quality medication to treat their pain and inflammation after cataract surgery, we've been able to streamline their experience by minimizing confusion from complicated instructions and multiple bottles of medication.

Having multiple medications (steroid, antibiotic, NSAID) in one bottle with simplified dosing instructions was the main motivation for us. We're prescribing prednisolone, moxifloxacin and bromfenac (OMNI by OSRX®) compounded formulations. For dosing, we just do one drop three times a day until the bottle is gone. It's been an amazing experience that has helped us advance patient benefits and simplify how we communicate with patients and their family members. We've been able to bypass a lot of the chaos associated with prescribing eye drops – pharmacy callbacks, drug substitutions, insurance reimbursement, etc. We have customized handouts with personalized information for patients about their surgery, OSRX pharmacy and the process for having the drops conveniently mailed to their home. Our patients do not need to go to the drug store and their postoperative drops are affordable.

My staff and I have great confidence knowing compounded drops improve patient compliance – which helps them achieve the outcomes we expect. We pride ourselves on appropriate post-operative care and patient medication management is an essential component of achieving those outcomes. Perhaps equally important is that since starting to prescribe OMNI formulations from OSRX, we're better able to focus our staff time on the patients, not their medications. We are no longer spending extra resources to hire employees to manage prior authorizations and pharmacy phone calls, which distracts from our primary goal of giving patients our full attention while we're in clinic. I can spend more face-to-face time with my patients, provide better service and a more seamless experience. That is ultimately what the doctor and patient are striving for.

Of course, cost is also a huge factor. With the changing landscape of insurance and variable coverage, it's difficult to give patients an exact estimate for eye drop costs when sent to a traditional pharmacy. With compounded drops, though, we now have consistent pricing, clarity and can provide more predictability for our patients.

When patients are deciding about surgery, there is a lot of information given to them to consider – lens selection, premium options and more. Our patients appreciate that drops from OSRX are affordably priced so that they can focus on their wellbeing.

Finally, our internal experience for both my staff and me has been excellent and simplified by the OSRX team. They continue to communicate with our team regularly and we feel comfortable contacting the pharmacy with any questions or needs. OSRX continues to provide high-level customer support while expanding their offerings of high-quality formulations we need for our patients. I'm grateful to have OSRX and their continued commitment to patients and clinicians as part of my team.

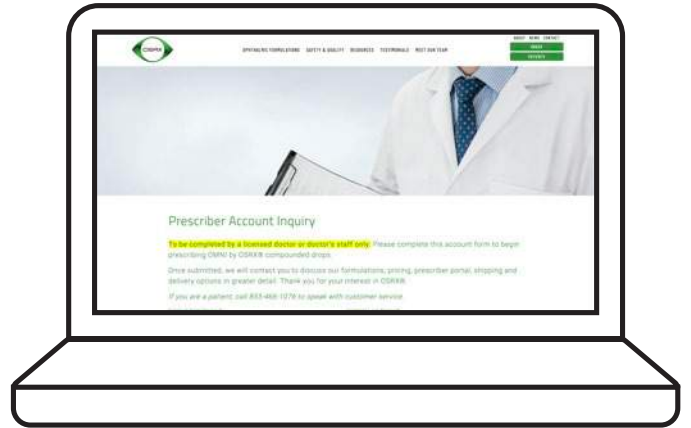

Compounded drugs are not FDA-approved, which means they have not undergone FDA premarket review for safety, effectiveness, and quality. 503A compounding pharmacies are not required to comply with cGMP requirements but can be inspected by FDA. *Volume discounts available.

OSRX Prescriber Portal

1. Visit osrxpharmaceuticals.com/account to submit a new account request
2. An OSRX representative will contact you to provide credentials to our prescriber portal
3. Log into prescriber portal and follow the instructions to submit prescriptions

EMR / E-Prescribing

1. Locate OSRX under "retail or mail order" pharmacies in your EMR system
2. Medications must appear on e-prescriptions exactly as listed on our EMR Instructions, located at osrxpharmaceuticals.com/resources
3. ALWAYS send a test prescription prior to beginning to order product.

Questions? Call, email or live chat our customer service team.

Check out our helpful "how-to verify your address & submit payment from your phone" video at osrxpharmaceuticals.com/patient.

We are with you **every drop of the way.**

Our team works hard to exceed all industry standards and requirements. To confirm sterile integrity, our clean room is tested and certified. To ensure accuracy, all sterile manipulations are performed only by our Pharmacists. All of our Pharmacists obtain an advanced certification in aseptic techniques specifically for compounding, which is beyond the industry standard. We take these steps and many more to ensure, with confidence, that you will receive the highest quality with each and every sterile medication we compound.
